D. M. FERRY & Co's

WHOLESALE LIST

OF

S E E D S

FOR

1891.

D. M. FERRY & Co.

SEEDSMEN,

DETROIT, - MICHIGAN.

TO THE TRADE.

In presenting our **Annual Wholesale Price List of Seeds in Bulk** for 1891, we can assure our customers that our crops of the past year are **very** satisfactory both in quantity and quality, and that our unremitting care in the past, in the growth, selection and improvement of our Seeds has been in no way abated. On the other hand we have added to our already extensive facilities for producing Seeds of the best quality, a farm of over two hundred acres, which is devoted **exclusively** to the production of **Stock Seeds**, that is, Seeds from which those we offer to our customers are grown. This farm is under our **own personal** supervision, and no **labor** or **expense** is spared to bring our stocks to the highest possible standard of purity and quality. Those seeds not adapted to this State we have grown for us, as usual, from carefully selected Stocks, by experienced growers in different parts of the United States, Canada and Europe. All these crops are also carefully inspected by us, and samples from the stock Seeds used are planted and examined on our own trial grounds, while the crops themselves are being produced.

Our prices are as low as any Seeds of equal quality can be afforded. We again refer dealers to our motto, viz.: **THE BEST IS ALWAYS THE CHEAPEST.**

While we exercise the greatest care to supply every article true to name and of the very best quality, we wish it distinctly understood that the success of a crop is dependent upon so many contingencies, such as conditions of soil and climate, mode of planting, etc., that we cannot warrant our Seeds nor hold ourselves liable or responsible for any loss or damage arising from any failure thereof. If our Seeds are not accepted on these terms, they must be returned at once.

Proportionately higher prices will be charged for quantities less than $\frac{1}{4}$ lb. or $\frac{1}{4}$ bu.

Where two qualities of any variety are quoted, the best will always be sent, unless specially otherwise ordered.

 Not bound by these prices for any definite time or quantity and subject to advance without notice.

TERMS—Net Cash June 1, 1891, without regard to date of purchase, or a discount of one per cent. per month on the unexpired time when paid before maturity.

Bills amounting to less than \$50 are net cash.

Field Peas, Clover, Hungarian, Millet, Timothy and all Grass Seeds, net cash, without any discount whatever.

CASH or satisfactory references must accompany orders from unknown correspondents.

DETROIT, January 10th, 1891.

D. M. FERRY & CO.

WHOLESALE PRICE LIST.

Challenge Dwarf Black Wax, Extra Early.

We have been testing this Bean carefully for three years, and now offer it as new, distinct, and altogether the earliest wax bean in cultivation; fully one week earlier than any other. It is as vigorous and prolific as Prolific German Wax, Black Seeded, and the pods are as large and of as good color, ripening remarkably uniformly and well together. No gardener can afford to plant any other variety for first early crop. Per Bushel, \$6.00.

 All varieties in heavy face type are of superior quality.

Golden Yellow Large Solid Celery.

A visit to the vegetable markets of any of our large cities will convince any one of the immense popularity of this celery for early market use, as three-fourths of all offered for sale will be found to be of this variety. Its beautiful yellow color, crispness, tenderness and fine flavor, make it the *best* for the early crop.

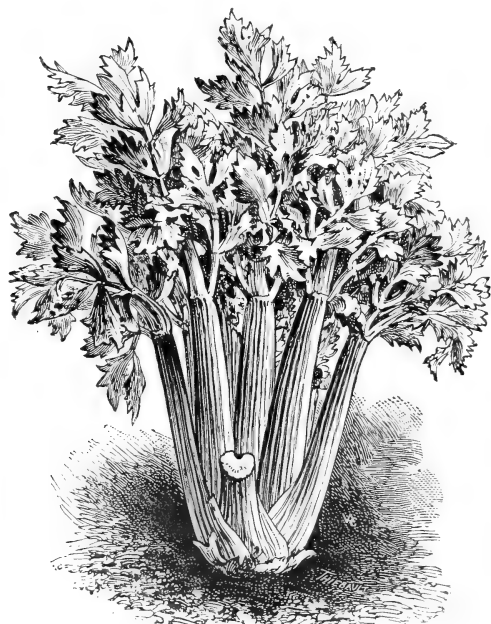

PER LB., \$2.50.

CORN—CAUTION.—Sweet Corn in bulk, even after being thoroughly cured, will often gather moisture and spoil, particularly if it has been exposed to a low temperature. To prevent this it should be taken out of the bag as soon as received and spread in a dry place. Our quotations are per measured bushel, shelled. D. M. F. & Co.

TOMATO—*Our strains of Tomato are all very even and pure; unexcelled by any.*

Atlantic Prize.....	Pitkin.....	2 25
---------------------	-------------	------

**ATLANTIC PRIZE.**

We have tested this variety extensively for two years side by side with all the leading sorts, both old and new, and are satisfied that it is the earliest tomato in existence. It not only ripens its first fruits, but a large proportion of the crop, earlier than any other sort, thus making it invaluable to market gardeners and all to whom earliness is an object. Per Lb., \$2.25.

EARLY RED APPLE.

We have selected this sort with great care several seasons. It is a very valuable variety and wholly distinct from the tomato ordinarily sold under this name. **Per Lb., \$2.00.**

TOMATO—Continued.

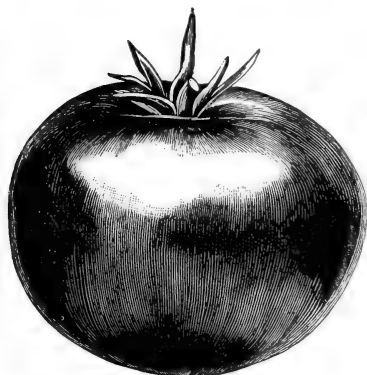

Early Red Apple, new, best flavored early

Tel. Cipher. Per Lb.

Tomato **Page** **\$2 00**

D. M. Ferry & Co.'s Optimus, the handsomest and best. Introduced by ourselves. Our

own original selected stock **Pawnee** **1 75**

OPTIMUS.

D. M. FERRY & CO.'S OPTIMUS TOMATO.

A variety introduced by us, and, we believe, the best table tomato in existence. The vine is medium sized, vigorous and productive, bearing its fruit in clusters of five. Although not presented as a first early sort, many of our customers report that they have obtained ripe fruit from this as early as from any variety. The fruit is medium sized, oval, smooth, and of exceedingly bright rich crimson-scarlet color; free from cracks, and rotting but very little. The flesh is of a crimson-scarlet color quite distinct from, and more beautiful than that of any other sort, and it is also the best in flavor, and entirely free from the hard spots found in other large sorts.

Per Lb. \$1.75.

HAND GARDEN IMPLEMENTS.

Our List is COMPLETE. It contains all the Best Implements of all Makers, and not a Single Undesirable Tool.

The "Planet Jr." Seed Drills & Cultivators.

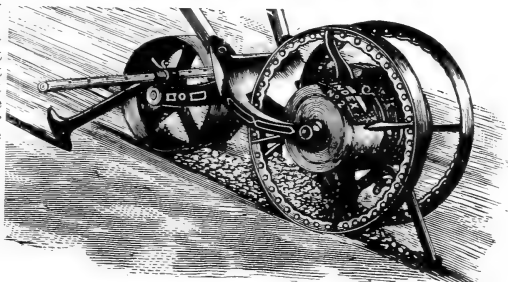

FOR PRICES SEE PAGE 47.

This most complete line of Tools is very popular, and deservedly so. They are reliable and very accurate, do not get out of order, and have been remodeled or greatly improved for the coming season's work.

THE "PLANET JR." No. 2 SEED DRILL.

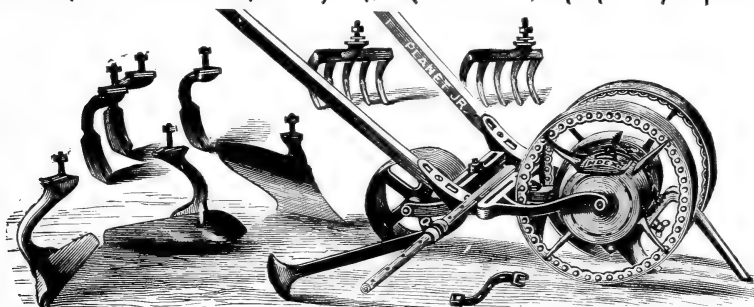

Sows all garden seeds accurately at any desired thickness or depth. Opening, dropping, covering, rolling down and marking the next row all at one passage in the most perfect and reliable manner. It holds $2\frac{1}{2}$ quarts. It is remarkable for simplicity, strength and for ease and perfection of work in the field. No one having use for a Seed Drill can afford to buy any other. It is the best.

Truckers, market gardeners, onion growers and all who raise vegetables in quantity, should supply themselves also with the "Planet Jr." Double Wheel Hoe. (Described on page 46.)

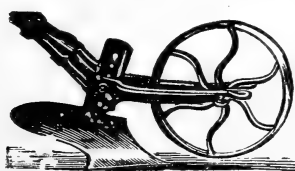

THE "PLANET JR."

Combined Drill, Wheel Hoe, Cultivator, Rake and Plow.

This tool is unrivaled in beauty of design, perfection of finish, convenience and capacity for work. It is suitable for either the farm or the garden. As a Seed Drill it is the same as the No. 2 (see description above), except in size. It holds one quart. For after care of the crop it is supplied with a pair of rakes, a pair of long hoes, three reversible cultivator teeth and a large garden plow. It is the best and most complete Combined Drill and Cultivator made.

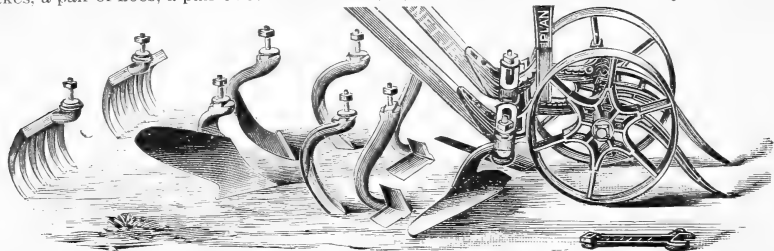

The "Fire-Fly" Wheel Garden Plow

Makes the care of a vegetable garden a pleasure, and 10,000 families who could not find time to keep a garden, if attempting cultivation with the ordinary hand hoe, can raise their own vegetables successfully with the "Fire-Fly." It takes the place of the horse and plow, or cultivator, requiring no wide headlands to turn on, and is invaluable during all the gardening season.

THE "PLANET JR." DOUBLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW.

This very popular tool has been greatly simplified, strengthened and improved, and merits the thorough admiration of every practical gardener. Each tool is sent out with a pair of rakes, a pair of hoes, a pair of cultivator teeth, a pair of four-inch sweeps, and a pair of Plows.

The wheels are adjustable in height, and the arch is 14 inches high. Leaf guards (detachable), go with each machine, to be used when plants extend into a wide row. This tool is light, very simple, made of the best material and highly finished, and nothing can exceed the perfection and variety of work it performs.

"PLANET JR." PLAIN DOUBLE WHEEL HOE.

To meet a demand from Onion Growers and others who want a Hoe only, we offer the Double Wheel Hoe, just described, supplied simply with one pair of long curved point hoes. This tool has the same adjustment of hoes and wheel as the above, and any or all of the other attachments may be added to this at any time, and will be found to fit.

THE "PLANET JR." GRASS EDGER.

A cheap, handy and effective Grass Edger is a treasure, and here it is; one with which you can in an hour edge beautifully the walks and the *flower and shrub beds* of an ordinary half-acre lawn. This perfect little tool does either *straight or curved* work most accurately, edging at the desired angle, and at the speed of a mile an hour.

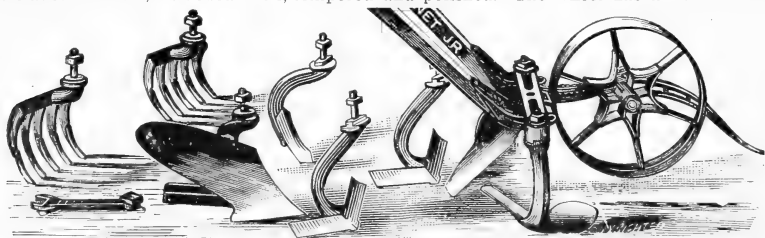

For heavy work the frame forms a pocket just the proper size to carry a brick, which gives the needed additional weight for effectual service.

Strawberry growers will find it also a rapid and perfect tool for cutting off surplus runners. For this work the hoe may be removed.

By removing the wheel, the hoe may be used alone with great satisfaction in the vegetable garden, first cutting away from the crop, and then returning the earth.

THE "PLANET JR." SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW.

Great strength, easy running, simple combinations, and variety of attachments are striking features of this favorite for the season of 1891. The full equipment is shown in the cut. All the blades are steel, hardened in oil, tempered and polished. The wheel has an extra broad

face, and is readily raised and lowered, and can be attached to one side of the frame so that one can cultivate both sides of a row of small plants at one passage. For the home vegetable garden its work is exactly what is needed for the easy cultivation of crops without the aid of a horse. Its lightness, strength and simplicity recommend it to all who examine it.

The "Fire-Flly" Single Wheel Hoe, Cultivator and Plow.

This popular implement has also been completely remodeled, and is greatly increased in strength and simplicity. The adjustment for depth is perfect, and, for the first time, it has been arranged to hoe both sides of a row at one passage, by attaching the wheel to one side of the main frame. It is similar in all respects to the "Planet Jr." Single Wheel Hoe just described, and does the same variety of work, *excepting it is not supplied with the new Rakes and Leaf Guard.*

MATTHEWS' GARDEN SEED DRILLS AND CULTIVATORS.

MATTHEWS' GARDEN SEED DRILL.

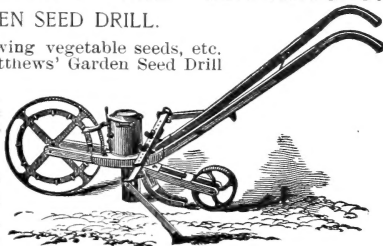

We know of no hand Garden Drill, for sowing vegetable seeds, etc. which has met with more popularity than the Matthews' Garden Seed Drill among market gardeners everywhere.

It is designed for use in field and garden. When in operation it opens the furrow, drops the seed accurately at the desired depth, covers it and lightly rolls the earth down over it, and at the same time, marks the next row.

A valuable feature in this Drill is its patent INDICATOR, with names of different seeds on it, for adjusting the Drill to sow different kinds of seed, which is done by simply turning the Indicator until the name of the seed you want to sow comes to the top. No other drill is furnished with this ingenious device.

The drill is made of the best material throughout, and is complete in all its arrangements.

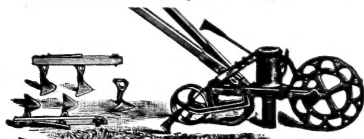

Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$7.00. (Tel. Cipher, Yates.)

Matthews' Improved Drill and Cultivator Combined.

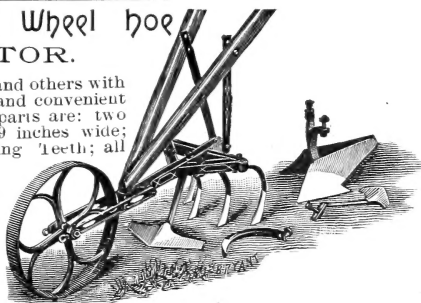

This machine is very efficient, either as a Drill or a Cultivator, and will be found to be adapted to any kind of soil. As a drill it possesses all the features of the Matthews' Garden Seed Drill of a smaller size. The Cultivator attachment has a set of teeth of an improved pattern, with STEEL BLADES of the best quality. Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$8.25. (Tel. Cipher, Yazoo.)

Hoes with long Steel Blades for use in exchange with the cultivator teeth. Price per pair, complete, delivered at Depot or Express Office in Detroit, Mich., \$1.25. (Tel. Cipher, Yankton.)

Gem of the Garden Hand Wheel hoe AND CULTIVATOR.

This implement is offered to gardeners and others with the assurance that it is the most effective and convenient tool of the kind yet invented. Its working parts are: two Scuffie or Cutting Blades, one 4½ and one 9 inches wide; two Plows, right and left hand; five Stirring Teeth; all made of best steel. The wheel and handles of the "GEM" are both adjustable in height, while the frame is so slotted that the hoes, teeth and plows can be set in almost any position or angle. The hoes, of thin steel, and presenting nearly a straight line to the work, avoid the "dodging" so common to tools of this kind. Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$3.75. (Tel. Cipher, York.)

THE WEED SLAYER.

In offering this tool we are confident from our experience with it that it is a very superior tool for use in the garden among onions, turnips, corn, potatoes, strawberries, etc., and for weeding among flowers and in gravel walks. It is light, weighing but 7 lbs.; strong, made of the best steel and iron; adjustable to any height of person, and cutting from one-half inch to one and one-half inches under ground and 7 inches wide. Price, packed and delivered at Depot or Express Office in Detroit, Mich., \$1.50 each. (Tel. Cipher, Young.)

SEED BAGS.

No doubt most Seedsmen have experienced considerable difficulty (as we have) in obtaining ready-made bags suitable for Seed purposes. Most in the market are *machine made*, with more or less *imperfections*, and frequently made from *very weak and poor paper*.

The following are all *hand made*, and designed especially for *Seed purposes*. The larger sizes, from 1 pint upward, are made from the *best rope Manilla Paper*, and are graded in weight or thickness according to size of bag. The smaller sizes are made from the finest finished paper obtainable. **Samples of all sizes furnished on application.**

NOTICE.

By making use of the following Telegraphic words for weights and measures, together with the Telegraphic Cipher attached to each article in this list, our customers will be able to order by wire at trifling expense. The Telegraphic words for QUANTITIES must always PRECEDE the cipher word for Seeds, and if the same quantity of several articles is needed, the word for that quantity should be placed before the word for the first article only. For example:—

FREIGHT, Righter, Kearney, Kossuth, Lehigh, means "Send by first freight Five Bushels each of Ferry's First and Best Selected, McLean's Little Gem and Champion of England Peas."

EXPRESS, Recanter, Broome, Burke, Carlton, means "Ship by first express Two Pounds each of Early Jersey Wakefield (true American), Early Winnigstadt and D. M. Ferry & Co's Premium Flat Dutch Cabbage."
